Introduce all your friends to bitcoin self-custody

One just needs to scan a QR code or share a bitcoin address to send and receive bitcoin. And yet bitcoin continues to be shrouded in myth and mystery. Tribe allows you to securely hold bitcoin and has built-in features for you to easily introduce your friends to bitcoin.

Use your own node

Tribe facilitates increased privacy if you run your own node and is compatible with many service providers.

Gift sats

Gift sats

A feature especially created for you to easily send bitcoin to your friends.

phrase, never tell them to anyone and periodically check your backup's health. This ensures that even if your phone gets lost/stolen/damaged, your bitcoin would be recoverable.
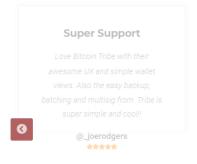

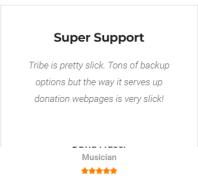

User Feedback

Tribe is the wallet that is, because of passionate users like you.
Check out what some of our users have to say about Tribe.

Super Support

Love Bitcoin Tribe with their awesome UX and simple wallet views. Also the easy backup, batching and multisig from. Tribe is super simple and cool!!

@_joerodgers

⭐⭐⭐⭐⭐

Super Support

Tribe is pretty slick. Tons of backup options but the way it serves up donation webpages is very slick!
